

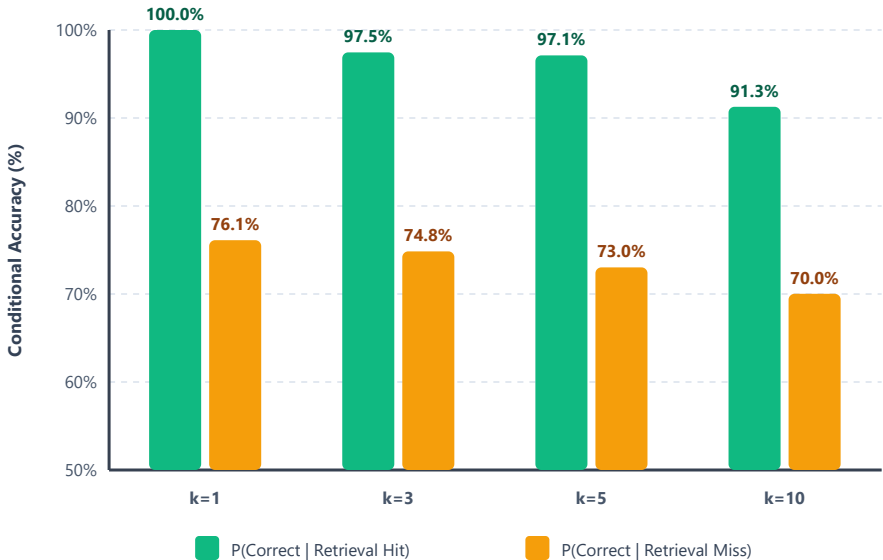

Figure 5: Downstream Attribution Accuracy Conditioned on Retrieval Success

Comparison of $P(\text{Correct} \mid \text{Hit})$ vs. $P(\text{Correct} \mid \text{Miss})$ across RAG depths

k=10 Subgroups: Retrieved N=321 (91.28%, 293/321) | Missed N=397 (70.03%, 278/397)

* Disclaimer: Subgroup differences are observational (association-only);
retrieval hit/miss is not randomly assigned.
